

Gorman-Redlich Mfg. Co. are the experts with more than **35 years of excellence** in broadcast alerting.

Our CAP-DEC 1 Common Alerting Protocol (CAP) equipment has been deployed in many radio and television broadcast installations for years, integrating its rich feature set with existing legacy EAS solutions.

The CAP-DEC 1 is classified as a Universal Intermediary Device—meaning that its Frequency Shift Keyed (FSK) audio output is compatible with Part 11 compliant legacy EAS equipment from any manufacturer.

The CAP-DEC 1 unit features the ability to receive alert messages from FEMA/IPAWS, MyStateUSA, RSS, and Atom alert feeds, filter them according to the user's needs, and provide output including print and email alert reports, EAS audio with text-to-speech (TTS), and multiple video display options.

Provides flexible options for CAP *Enhanced Text* output, including XBOB, VDS, CODI and Evertz equipment as well as Enhanced Text support for Gorman-Redlich EAS1 TV/CG units with firmware v20.9+.
